EXPERIENCE

Senior Software Engineer | THREE Insurance; Berkshire Hathaway — Remote, USA | 4/2026 - Present

- Automated end-to-end premium audits with Temporal workflows and a Django dashboard.
- Architected and implemented trunk-based development across the engineering team.
- Built Danger.js PR review gates and automated release versioning (GitHub Actions, Terraform).
- Mentored fellow engineers through pairing and code review.
- Hardened the Front API integration with throttling and Retry-After handling.

Zero-to-One Software Consultant & Entrepreneur | Self-Employed — Remote, USA | 8/2024 - Present

- Build frontend from scratch to closed alpha for stealth AI startup (Capacitor, React, TypeScript).
- Independently design, engineer, and market multiple full-stack apps (see Selected Projects).

Senior Software Engineer | Switchboard — Remote, USA | 7/2022 - 7/2024

- Shipped a recording engine with 100% reliability and instant cloud playback through extensive research and iterative prototyping (React, TypeScript, GraphQL, AWS, Mongo).
- Developed interactive recordings letting viewers pause and interact with content in real time.
- Shipped a collaborative PDF viewer with shared commenting, 95% faster than its predecessor.

Senior Software Engineering Consultant & Tech Lead | DEPT — Remote, USA | 12/2021 - 7/2022

- Served as technical lead on a greenfield hot desk tracking application.
- Founded a 91-member security collective focused on learning and sharing security practices.

Founder | Painless Prototyping — Boston, MA | 8/2020 - 10/2021

- Designed accessible, beginner-friendly kits for learning soldering, programming, and circuits.
- Launched BYO Keyboard Kit on Kickstarter, raising $31,828 from 510 backers.

Lead Full Stack Software Engineer | Prenda — Remote, USA | 2/2021 - 9/2021

- Led 10 engineers to rewrite the attendance tool, required for all company billing.
- Organized 25-person engineering team with all-hands, architecture, and learning meetings.

Senior Full Stack Software Engineer | Pluralsight — Boston, MA | 6/2018 - 2/2021

- Launched search engine serving 1.6M searches/month from idea to general release (React, TypeScript, Express, Elasticsearch, Python).
- Raised team health score from 3/5 to 4.5/5 through quarterly surveys and team building.
- Conducted user research and data analysis to prototype 10+ product improvements across search and content discovery.
- Delivered 15+ presentations on engineering topics and soft skills to audiences of 10–200 people.

Full Stack Software Engineer | Contract & Freelance — Remote, USA | 8/2015 - 3/2018

Environmental Health Specialist | Peace Corps — Panama | 6/2013 - 7/2015

SELECTED PROJECTS

Campaign Keep | campaignkeep.ing | React, TypeScript, Express, PostgreSQL, Supabase, Claude
Blockmosis | blockmosis.io | TypeScript, Canvas, Electron, Capacitor, Express, SQLite
Ideas Down | travisbumgarner.dev/marketing/ideas | React Native, TypeScript, Figma, Expo, Drizzle
gcode2dplotterart | travisbumgarner.github.io/gcode2dplotterart | Python, Docusaurus, G-Code

EDUCATION

B.S. in Mechanical Engineering — Rutgers University | New Brunswick, NJ | 6/2013
